

Q1 2011 MOTABILITY PRICING

Notes:

For Motab applications from January 1st 2011, KMUK and Motability Operations have agreed that Solid Paint vehicles and Metallic Paint vehicles can be applied for on the Motability Scheme using the same VTNs and Profile Codes. The Advance Payment for Solid Paint vehicles will be exactly the same as the Metallic equivalent. Please ensure that you continue to identify the correct paint type and colour on the appropriate page/screen of the Motability On-line Application System.

Please note that in future motability will always pay out based on the non metallic paint basic price, where a metallic paint vehicle is supplied via motability KMUK will make a payment via KIMS to cover the cost of metallic.

We are please to announce that as of 1st January the New Sportage will be available on Motability.
However as production capacity is limited for the time being only the 1.7 CRDi derivatives are currently available.
